Telephonic Court Appearances

Judges Help To Reduce The Cost of Litigation By Over \$150,000,000.00 in 2010!

Los Angeles, December 9, 2010 (Business Wire)

As they have since 1995, Judges across the United States, Canada, Puerto Rico and the Virgin Islands are driving down legal costs, while helping attorneys to avoid needless trips to the Court. The thousands of Judges who allow CourtCall Telephonic Appearances are using familiar technology to enable attorneys to telephonically appear at non-evidentiary pre-trial Civil, Probate, Family, Criminal and Bankruptcy proceedings. With CourtCall, attorneys appear in Court without making a trip across the street, across town, across the state or across the country.

"In 2010, alone, Judges helped lawyers to skip over 1,000,000 trips to and from Courts in State, Federal and Bankruptcy Courts in both the largest and smallest Courts one can imagine and they are to be applauded," said Bob Alvarado, CourtCall's CEO. "That conservatively converts to over \$150,000,000.00 in attorney time savings and the elimination of tons of CO₂," observed Mark S. Wapnick, CourtCall's President, who conceived of the turn-key telephonic appearance program.

Most compelling is that the benefits of the CourtCall program are achieved at no risk or cost to the participating Courts.

Given that the program is free to the Courts, can be up and running in a matter of days without disruption and requires no change in a Judges' daily routine, it is easy to understand why Judges are joining on an almost daily basis.

"If allowed the opportunity, we can extend the benefits of our program to virtually every Court, everywhere," Alvarado said. "Unfortunately, notwithstanding our significant progress, thousands of needless trips are still being made to Courts, everyday. As we know that no Judge wants lawyers to waste time or the members of the public, small and large businesses and insurance companies to bear wasteful litigation expenses, our challenge remains to get the word out to all Judges, as quickly as possible."
