Telephonic Court Appearances

NEWS RELEASE

Judges and Lawyers Go Green Everyday with CourtCall Appearances!

LOS ANGELES, Sep 04, 2008 (BUSINESS WIRE) -- Since 1995, hundreds of Judges and tens of thousands of attorneys have quietly led the charge to help save the environment, save gas and save hundreds of millions of dollars in litigation expenses by embracing CourtCall's telephonic appearance program.

"Last year we completed our 1,000,000th CourtCall Appearance. This reminded me of several important milestones attained over the years," said Bob Alvarado, CourtCall's CEO. "We helped to eliminate approximately 2,000,000 car trips to and from Courts helping to save on the order of 2,000,000 gallons of gasoline while saving attorneys millions of hours and their clients hundreds of millions of dollars. All of this with the added and increasingly important benefit of helping to eliminate 18,000 to 25,000 metric tons of CO2 from polluting our air." These benefits were attained without cost to the participating Courts, at nominal cost to attorneys and with correspondingly important savings for clients.

"We are quite proud of what we have accomplished and of how we have been welcomed by Judges, Court Clerks, Court Administrators and Attorneys around the country," said Mark S. Wapnick, Alvarado's law partner and co-founder of CourtCall. Wapnick had the idea for CourtCall in 1995 while sitting in Los Angeles' notoriously bad traffic. "We are thrilled with our growth and see that growth accelerating. Short of full-blown trials (and there have been a few of those handled by phone), there are very few Court Appearances that cannot be handled by CourtCall in the various Federal, Bankruptcy and State Courts we serve."
